

Action by Missouri Clean Water Commission

Date of Action: January 4, 2006

Water Body:

Name: Coon Creek
Classification: C
Identification #: 0132
Length of Segment: 9.0 miles
County (ies): Monroe & Randolph

Review Committee Recommendation (July 2005):

☒ Retain Use ☐ Modify Use ☐ Remove Use ☐ Inconclusive

The UAA review committee recommended retaining the WBC recreational use designation based on the UAA providing evidence of adequate depth for WBC to be attained.

The Commission Action (September 2005):

☐ Retain Use ☐ Modify Use ☒ Remove Use ☐ Inconclusive

The Commission voted to remove the WBC recreational use designation for the classified portion of Coon Creek in Monroe and Randolph Counties (from its mouth upstream to Section 08, Township 53 North, Range 13 West (S08, 53N,13W)). Reasons for the use removal include overall absence of sufficient depth and flow, and inaccessibility to the stream by the general public.

Review Committee Recommendation after considering Public Comments (December 2005):

☒ Retain Use ☐ Modify Use ☐ Remove Use ☐ Inconclusive

The UAA review committee recommended retaining the WBC recreational use designation based on public comments. The public comments documented that several landowners previously swam and fished in the creek and several report that children play, wade and fish. Dr. Afrassiab, a landowner in upper segment of classified section, reports at least secondary contact recreation activities by her children and several deep holes in the creek on her property. Interviews by three citizens indicate the stream has adequate depth for whole body contact recreation (WBCR).

Commission Action (January 2006):

☐ Retain Use ☐ Modify Use ☒ Remove Use ☐ Inconclusive

The Commission voted not to restore WBC recreational use designation for the classified portion of Coon Creek in Monroe and Randolph Counties that was previously removed by the Commission September 2005 action.
